Dear Sir or Madam,

MAJOR TRANSACTION PURCHASE OF WIND POWER ELECTRICITY GENERATION EQUIPMENT

INTRODUCTION

Reference is made to the announcements of the Company dated 23 July 2015, 26 January 2016, 6 April 2016 and 2 August 2016 in relation to the purchase of wind power electricity generation equipment from the Supplier for the Group's wind farm project in Hunan Province (湖南省) and Anhui Province (安徽省), the PRC pursuant to the Previous Purchase Contracts.

LETTER FROM THE BOARD

Reference is also made to the announcement of the Company dated 22 September 2016. On 22 September 2016, HNEE and the Supplier, an Independent Third Party, entered into the Purchase Contract 5 regarding the purchase of wind power electricity generation equipment from the Supplier at an aggregate consideration of RMB428,000,000 (equivalent to approximately HK\$496,480,000) for the Group's wind farm project in Henan Province (河南省).

THE PURCHASE CONTRACT 5

The principal terms of the Purchase Contract 5 are summarised of follows:

Date: 22 September 2016

Parties: HNEE, the buyer

Xinjiang Goldwind Science & Technology Co., Ltd.* (新疆金風科技股份有限公司), an Independent Third Party, the supplier

Consideration: RMB428,000,000 (equivalent to approximately HK\$496,480,000)

Under the Purchase Contract 5, the Group has agreed to buy from the Supplier (i) 24 sets of wind power electricity generation facilities of 2,500KW each; (ii) 20 sets of such facilities of 2,000KW each and (iii) ancillary equipment for the Group's development of the Henan Project with a capacity of 100MW.

The amount of consideration includes fees in relation to, inter alia, the purchase of machinery and equipment, technical support services to be provided by the Supplier, tax payment and delivery and insurance costs. The Supplier will provide a warranty period of 5 years in respect of the machinery and equipment supplied.

The above consideration payable by the Group is on normal commercial terms and is agreed after arm's length negotiation principally with reference to the market unit price and quantity of each machinery, equipment or forming part of the wind power electricity generation equipment to be supplied as set out in Purchase Contract 5.

According to the Purchase Contract 5, the Supplier shall pay 10% of the above consideration within 15 days from the effective date of the Purchase Contract 5 as performance bond for any breach of its obligations under the Purchase Contract 5, which shall be refunded to the Supplier within 30 days after completion of the pre-examination of the relevant machinery and equipment. 10% of the above consideration shall be payable within 35 days after receipt of the performance bond deposit and evidence of such payment.

LETTER FROM THE BOARD

The Supplier shall deliver and install machinery and equipment of 100MW, and the payment of consideration to be made by the Group by instalment will be based on the stages of completion, including the time of delivery and examination of Equipment on the terms of Purchase Contract 5.

The consideration will be payable in cash or by way of acceptance bill of exchange. The purchase will be financed by internal resources of the Group or borrowings.

THE SUPPLIER

The Supplier is a supplier of wind power machinery and equipment in the PRC. To the best of the Directors' knowledge, information and belief having made all reasonable enquiry, the Supplier and its ultimate beneficial owner(s) are the Independent Third Parties.

REASONS FOR AND BENEFIT TO ENTERING INTO THE PURCHASE CONTRACT 5

The Group is principally engaged in (i) investing in wind and solar power projects and (ii) offering professional technical services and integrated solution to the wind and solar power generation projects.

It is in the ordinary and usual course of business of the Group to build wind power plants in the PRC, including, among other projects, the subject projects in Henan, the PRC. The purchases of the machinery and equipment from the Supplier under the Purchase Contract 5 represent part of the Group's ordinary investments in its wind power projects.

The Purchase Contract 5 was entered into after the Group's tender process. The Group evaluated the terms of the Purchase Contract 5 based on, among other factors, the specifications and needs of the Group, the credentials and experience of the Supplier, the quality of the products to be supplied by the Supplier, the services agreed to be rendered by the Supplier, the products warranty provided by the Supplier and the terms offered by other suppliers to the Group.

The Directors (including the independent non-executive Directors) consider that the overall terms offered by the Supplier under the Purchase Contract 5 are on normal commercial terms, fair and reasonable and in the interests of the Company and its shareholders as a whole.

LETTER FROM THE BOARD

6. FINANCIAL AND TRADING PROSPECT OF THE GROUP

As mentioned in the “Outline of the 13th Five-Year Plan for the National Economic and Social Development of the PRC”, by 2020, the proportion of non-fossil energy to China’s total primary energy consumption will reach 15% and the carbon dioxide emission per unit of GDP will decrease by 18% as compare to that of 2015. To achieve this target, during the period of the “13th Five-Year”, China will substantially increase the proportion of non-fossil energy consumption. According to the preliminary plan, by 2020, Mainland China will have installed capacity of wind power and solar power reaching 250GW and 150GW, with planned generation of wind power and solar power keeping 30GW and 20GW each year. In March 2016, the National Energy Administration (“NEA”) issued the “Notice on Issuing the 2016 Programme for the Nationwide Development and Construction of Wind Power” (《關於下達2016年全國風電開發建設方案的通知》) stating the development and construction capacity of wind power in Mainland China this year will reach 30.83GW, which continuously maintained a strong development trend. In June 2016, NEA also issued the “Notice on Issuing the 2016 Plan for the Construction and Implementation of Photovoltaic Power” (《關於下達2016年光伏發電建設實施方案的通知》), pursuant to which, the construction capacity of new photovoltaic power station in Mainland China targets to 18.10GW in 2016. In light of the changes in national policy, the Directors are optimistic about the prospect of the wind power and solar power business in PRC.

According to the Company’s Interim Report 2016, the power plants controlled by the Group achieved net profit of HK\$207,272,000 (2015 first half: HK\$114,617,000) from power generation in the first half of 2016. The Group’s power plants, including those which were subsidiaries, associates and joint ventures of the Group, generated aggregate of electricity output of 1,990.07 million kWh (2015 first half: 1,590.53 million kWh) in the first half of 2016, of which wind power generation was 1,554.00 million kWh (1H2015: 1,334.18 million kWh), up by 16.48% as compared with the same period last year and solar power generation was 436.07 million kWh (1H2015: 256.36 million kWh), up by 70.10% as compared with the same period last year. The Directors are of the view that the wind power and solar power business will continue to be an important source of income to the Group and create value and benefit the Shareholders.

Therefore, the Company will continue its focus and effort to develop the Group’s wind power and solar power business and continue to explore potential investment and cooperation opportunities in the PRC.
